Subject Re: dialog box

Hello Ferdinand

The current version of CutePDF Writer will use print job title as the default filename.  
You have to find the settings in your source application to change the default print job title.  
You may contact their support.

Regards,  
Support Team

Subject: dialog box

Date: 7/16/2009 5:11:11 AM

Name: Ferdinand  
Products: CutePDF Writer  
OS: Windows XP  
Serial Number: Try  
Description:

I use CutePDF Writer for create pdf-file out of  
AutoCAD2004 too. In the dialog box "Save file As"  
every time be created a default filename constructed  
such as

"drawing5 Layout2#A2 (1).pdf"

drawing5.....CURRENT FILENAME  
Layout2#A2.....CURRENT LAYOUTNAME

It's possible to automatic feed (e.g. by autolisp  
utility) other output filename? I would like to use  
data from CURRENT LAYOUT's title block. Existing some  
method for insert the created string into dialog  
boxes edit line?
